SUPPLIERS

As a distributor, the Company can count on the support of the major international manufacturers for the distribution of their material at favourable conditions of supply. To be underlined the historical position of Tenaris official distributor: we are their biggest customer as a stockist and have long reference of projects supplied together, especially where the kind of job is not suitable for a mill.

Additionally, CTA stocks material coming from the other main W.E. manufacturers (V&M as an example) and have enough volume to get competitive conditions also from Eastern European manufacturers.
